**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Dewald et al (US Pat. No 6,771,325).

Regarding claim 1, Dewald discloses a lighting system comprising: a light source (804, fig. 8) a means of collecting and focusing light from said light source (reflector 806), an aperture (812), at least one color filter (814), and an image lens ( lens positioned on the down stream of color filter 814), wherein a light beam from said light source is focused through said aperture to define an object to be projected, said aperture being positioned upstream of said color filter (fig. 8).

Regarding claim 2, Dewald further discloses that the filter and said image lens are deployed in an area of said light beam where a diameter of said light beam is smaller than a diameter of said aperture (it is apparent that the concentrated light beams 818 and 802 are smaller than the aperture 812 as shown in figure 8).

***Allowable Subject Matter***

Claims 3-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 3 is objected to because in part recites "...wherein the filter is a two stage filter, said filter comprising a first gradient region that is partially coated with a pastel color filter medium, a first region that is coated with said pastel color filter medium, a second gradient region that is partially coated with a saturated color filter medium, and a second region that is coated with said saturated color filter medium." The filter structure as defined in claim 3 was suggested or taught in the prior art of record. Claims 4-15 are allowed because being either directly or indirectly depended on claim 3.

Claims 16-28 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record failed to teach or suggest a two stage filter having a first gradient region that is partially coated with a pastel color filter medium, a first region that is coated with said pastel color filter medium, a second gradient region that is partially coated with a saturated color filter medium, and a second region that is coated with said saturated color filter medium.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Childers et al (US Pat. No 6,729,734), Kim et al (US Pat. No 6,824,270), Bornhorst et al (US Pat. No 5,825,548), and Richardson et al (US Pat. No 6,824,270) all are cited of interest.
